

Fossil CO₂ emissions per capita in Curaçao from 2015 to 2020

(in metric tons)

Curaçao: fossil CO₂ emissions per capita 2015-2020

Published by [Jan Tiseo](#), Feb 3, 2022

ii Fossil CO₂ emissions in Curaçao amounted to an estimated 16.87 metric tons per person in 2020, down from nearly 30 tons per capita in 2015. Despite this decline, Curaçao, an island in the Caribbean sea, had the second highest [fossil CO₂ emissions per capita in Latin America and the Caribbean](#) that year.
